

EDUCATION

Birla Institute of Technology and Science (BITS Pilani)
B.E. Electronics and Communication, 2020 – 2024

EXPERIENCE

Ultimate Kronos Group (UKG)

Software Engineer II, Dec 2025 – Present

Software Engineer I, Sep 2024 – Dec 2025

- Architected feature flagging system using LaunchDarkly across microservices, enabling controlled rollouts and A/B testing, improving deployment safety and speed by 20–30%
- Led migration from JDK 11 to JDK 17 across services, improving JVM performance by ~15–20% and reducing memory overhead
- Built AI-driven observability system using Spring AI and Claude to automate root cause analysis, reducing debugging time by ~30%
- Optimized Kubernetes auto-scaling and resource allocation, reducing service downtime during peak traffic by ~25%
- Enhanced inter-service communication by integrating service mesh, improving reliability and fault tolerance in distributed systems
- Designed and delivered high-throughput REST APIs for scalable backend systems

Atomicwork, Bangalore

Engineering Intern, Jan 2024 – Aug 2024

- Engineered Azure AD-based authentication and authorization, reducing manual user provisioning effort by ~40%
- Integrated Twilio API for OTP-based password reset, improving password recovery success rate by ~15–25%
- Streamlined CI/CD pipelines using GitHub Actions, faster and more reliable deployments

Swecha

Software Development Intern, Jun 2022 – Jul 2022

- Built machine learning-based fake news detection system using NLP and web scraping, achieving ~60% accuracy
 - Built responsive React components, improving page load performance by ~25%
-

PROJECTS

Hyperlocal Delivery Platform (Blinkit-style)

- Designed scalable backend supporting real-time ordering from nearby vendors
- Implemented JWT-based authentication with OTP verification using Twilio for secure login
- Integrated Razorpay payment gateway for seamless transactions
- Optimized database queries, improving API response time by ~30%
- Tech: Node.js, Express.js, SQL

Stock Market Prediction using LSTM

- Built time-series forecasting model using LSTM for stock trend prediction
 - Improved prediction stability using moving averages and Monte Carlo simulations
 - Analyzed historical stock data to identify trends and correlations
-

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript

Backend: Spring Boot, Node.js, Microservices, REST APIs

Frontend: React, Angular

Databases: MySQL, PostgreSQL

Messaging Systems: Apache Kafka, RabbitMQ

Concepts: Data Structures and Algorithms, System Design, Distributed Systems

Tools and Platforms: Docker, Kubernetes, Git, CI/CD, Argo CD, LaunchDarkly
